ARLA STRONG

A NEW AND EXCLUSIVE TYPEFACE FOR ARLA

ARLA

Introducing Arla Strong – A new typeface for Arla.

Looking to Arla's roots, it is inspired by Scandinavian typography found on everything from road signs to ferries, strong type that more often than not has been crafted by hand.

Developed exclusively for Arla – Arla Strong was designed by Wieden+Kennedy London, in collaboration with Stockholm based type foundry Letters from Sweden.

It has been designed as a display typeface, to be used for headlines only. When longer form text is required it should be paired with Arla Interface.

Arla Strong comes in two cuts – Mono & Regular.

To bring unity to the Arla brand, Arla Strong has been designed to be distinct enough to be ownable, but neutral enough to compliment a broad product range.

Arla Strong is an integral part of Arla's new visual language. A design system that will form a consistent thread across all Arla sub-brands and products, reinforcing Arla Brand values across all platforms.

Further to the typeface, the design system is made out of different elements – colour and product approach, photographic style and a flexible grid.

STRONG

ARLA STRONG DESIGN FEATURES

INNER STRENGTH

The typeface's key characteristics have been designed to convey the core of Arla's positioning – Inner Strength.

Each character has a solid feel, but in a natural way, that doesn't feel overpowering.

Square characters occupy their space with presence.

Rounded letterforms square off slightly.

Corners are slightly rounded for a softer, more human feel.

DEFINING FEATURES

It has been designed to feel unique and distinctive, something that Arla can own. Therefore the typeface has a few stronger personalities to make it recognisably Arla.

AIJMYV

DIACRITICS

As these are commonly used across Arla's markets we have paid extra attention to them.

The distinctive connected diacritics have been designed to not disrupt layouts with tight leading, and vertically set type. They also add to the overall uniqueness of Arla Strong.

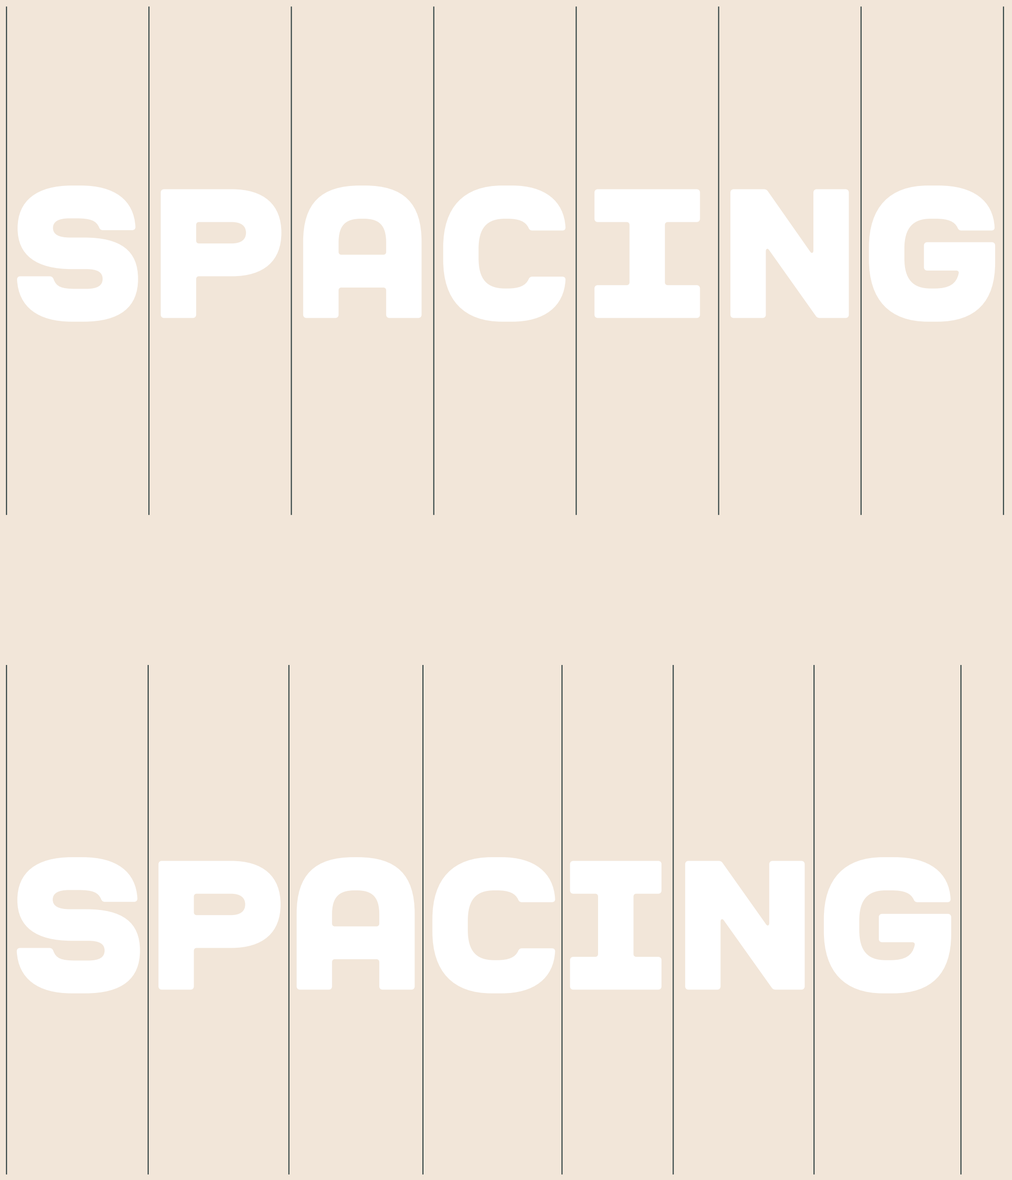
HOW TO USE ARLA STRONG

MONO VS REGULAR

Arla Strong comes in two cuts, Mono and Regular.

Mono gives each character equal width and spacing. Whereas Regular has variable width.

The primary headline cut is Mono, it can be set both horizontally and vertically. The Regular cut should be used when type is set more traditionally with several words on the same line.



DO

1. Do create expressive layouts with the Mono cut.
2. Do set type vertically with the Mono cut.
3. Do set sentences in the Regular cut.
4. Do set body text in Arla Interface.

1.

2.

DAIRY

3.

SUSTAINABLE FARMING HAND IN HAND WITH NATURE

4.

Where possible, we grow animal feed on our dairy farms. This reduces our ‘food miles’ and reliance on imported feeds, in turn reducing our carbon footprint and ensuring a sustainable, consistent, and high quality milk production.

DON’T

1. Don’t create expressive layouts with the Regular cut.
2. Don’t set type vertically with the Regular cut.
3. Don’t set sentences in the Mono cut.
4. Don’t set body text in Arla Strong.
